

Heartsaver® Bloodborne Pathogens Online

Make a PACT, Know How to Act™

Course Covers:

Through the Heartsaver Bloodborne Pathogens Course, students learn how to:

- **Protect themselves from exposure to bloodborne pathogens**
- **Act when exposed to blood or blood-containing materials in the workplace**
- **Clean themselves and the area when exposed to blood or blood-containing materials in the workplace**
- **Tell or report any exposure to blood or blood-containing materials in the workplace**

The Heartsaver Bloodborne Pathogens Online Course is a self-directed eLearning course designed to meet Occupational Safety and Health Administration (OSHA) requirements for bloodborne pathogens training when paired with site-specific instruction. Like the classroom-based course, it uses the PACT acronym (Protect, Act, Clean, Tell) and slogan, "Make a PACT, Know How to Act," to help students learn and easily recall bloodborne pathogens training.

The Heartsaver Bloodborne Pathogens Course was designed for anyone with a reasonable chance for occupational exposure in workplace settings such as industry and manufacturing, Fortune 1500 companies, occupational health, property management, hospitality, security, and health and fitness staff. In addition, childcare workers, school personnel, maintenance workers, tattoo artists, and state corrections facilities may be interested in the course due to additional state regulations.

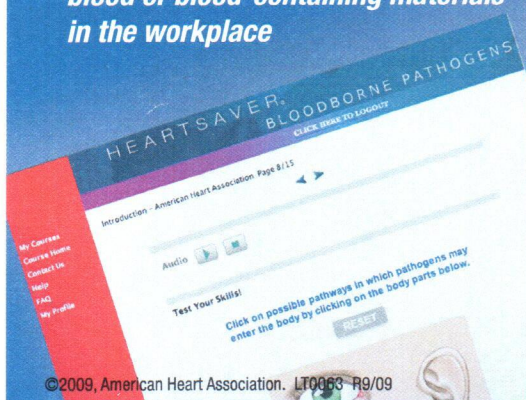

ISBN: 978-0-87493-861-6 Product: 80-1501

Features

- Available online, with simple course registration
- Interactive activities and video demonstrations of skills
- Provides participation certificate once student has finished all modules
- No skills test or skills demonstration session required
- Online course evaluation
